

Anacortes Clean Boating Symposium

Sponsored by Port Supply/West Marine, The Clean Boating Foundation and the Northwest Center of Excellence for Marine Manufacturing & Technology

Friday June 7th, 6-8 pm

**At: Northwest Center of Excellence for Marine Manufacturing & Technology
1606 R Ave., Anacortes WA 98221**

Please join us for a discussion regarding current and upcoming legislation concerning cleaner boating. Company representatives will be on hand from Port Supply, West Marine, Pettit Paint, Martyr Anodes, Marinco Electrical, Starbright, and the Clean Boating Foundation to discuss when we must comply, why we want to be proactive by starting now, and how to do it economically.

Topics to be discussed

- **Copper free bottom paints – What is available and what work now.**
- **Cadmium free aluminum anodes – Why they are better for the environment, why they last longer, and why they are less expensive than traditional zinc anodes.**
- **Galvanic corrosion prevention – How to protect your boat in a hot marina environment.**
- **Safer cleaning solutions. – Making wise choices regarding the products that we use to clean our boats.**

This is an interactive symposium so please come with your questions and concerns! For more details, please contact me:
